(54) AUTOMATIC TELLER MACHINE

(57)Abstract:

PURPOSE: To speedily and easily perform balance management for the very person and relative accounts and inhibits transactions of an account in case of a card robbery and to improve services to users and simplify window operation by restricting the transactions of an account that a user optionally specifies and resetting the restriction by using the automatic teller machine.

CONSTITUTION: The automatic teller machine has a function which can sets the restriction of the transactions of the account that the user optionally specifies and its resetting as one transaction, and consequently the transactions of the specified account is restricted and released. Consequently, the transactions of the account that the user optionally specifies by using the automatic teller machine are restricted and released to speedily and easily perform the balance management of the very person and relative accounts and inhibits the transaction of the account in case of the card robbery, thereby improving services to users and simplifying window operation.

LEGAL STATUS

[Date of request for examination] 12.01.1999

[Date of sending the examiner's decision of rejection] 03.07.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
